

Adaptiv | SD-WAN

Agile Networking for the Cloud-first Business

Today's businesses require more than just site-to-site connectivity, you need an agile and secure network that's built to run cloud-based business services with faster speeds, higher reliability and lower operating cost.

A new breed of agile, cloud-ready networks has emerged known as Software-Defined Wide-Area-Network (SD-WAN).

Adaptiv | SD-WAN Features

NETWORK-AS-A-SERVICE

One simple site license includes everything you need for your managed SD-WAN experience.

CLOUD-BASED MANAGEMENT

A certified SD-WAN provider manages your network through our centralized cloud portal.

AUTOMATIC SITE FAILOVER

Seamless failover instantly reacts to keep your entire branch network connected.

BI-DIRECTIONAL QOS

We prioritize and protect priority network traffic to ensure voice quality over broadband.

MULTI-LINK AGGREGATION

Combine up to 8 links to create a faster and more reliable connection to any site in your network.

SITE-TO-SITE CONNECTIVITY

Automated encryption provides secure end-to-end transport between all your SD-WAN sites.

Benefits of SD-WAN

REDUCE OPEX

Economies of scale for your bandwidth and IT budget.

INCREASE RELIABILITY

Always-on connectivity for business critical cloud services.

NETWORK AGILITY

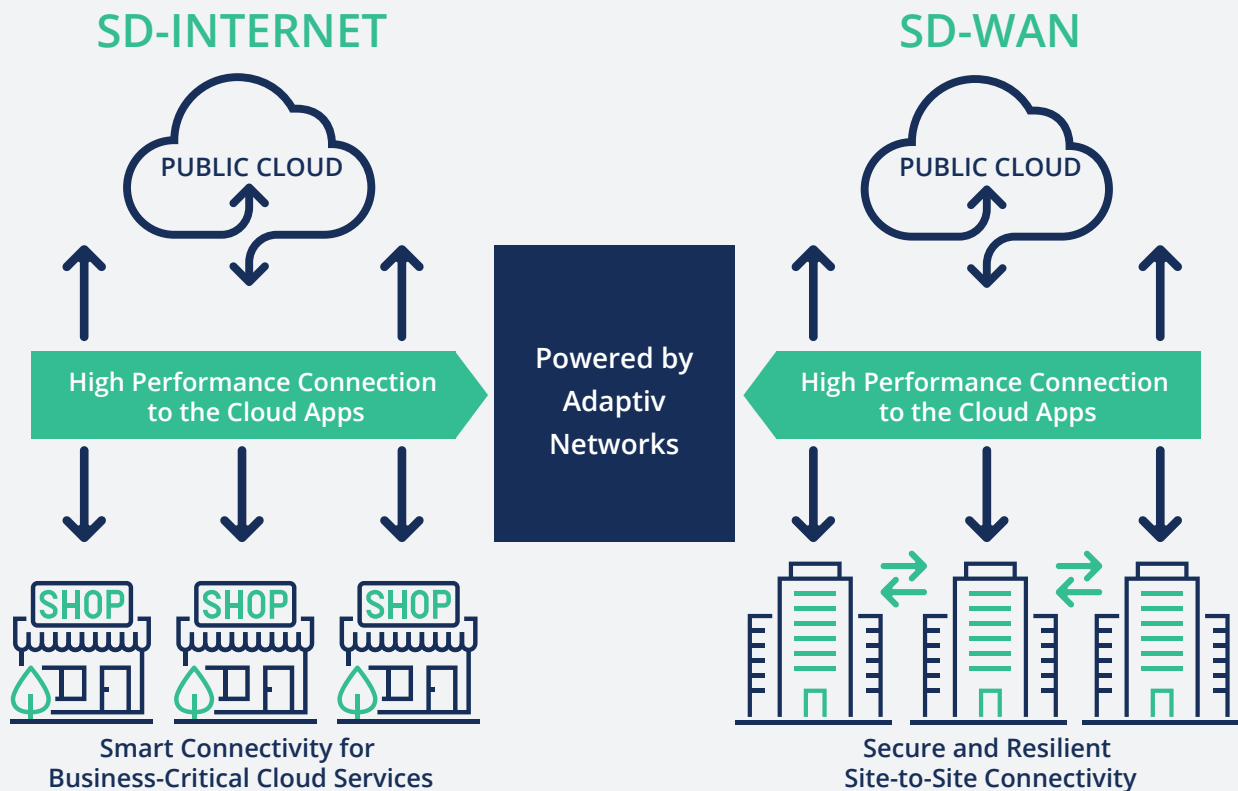

Quickly and easily add new sites or increase bandwidth.

CLOUD PRODUCTIVITY

Faster and more responsive connections to business cloud apps.
