HD 720P
720P HD Video

· Designed with Yealink first-class HD voice technology enables every participant to hear clearly and understand accurately.

· Easy access to professional 720P HD video communication with Yealink plug-and-play camera, featuring angle adjustable (up and down) to meet personal and environmental needs.

· Yealink Noise Proof and Acoustic Shield technologies that effectively eliminate background distractions and noises, deliver crystal clear voice even in a noisy environment.

User-centric Intuitive Design

Allowing users to continue their habits of using a mobile phone, with a 7-inch full color touch screen and familiar feature icons. Lowering down the learning curve and speed up user adoption.
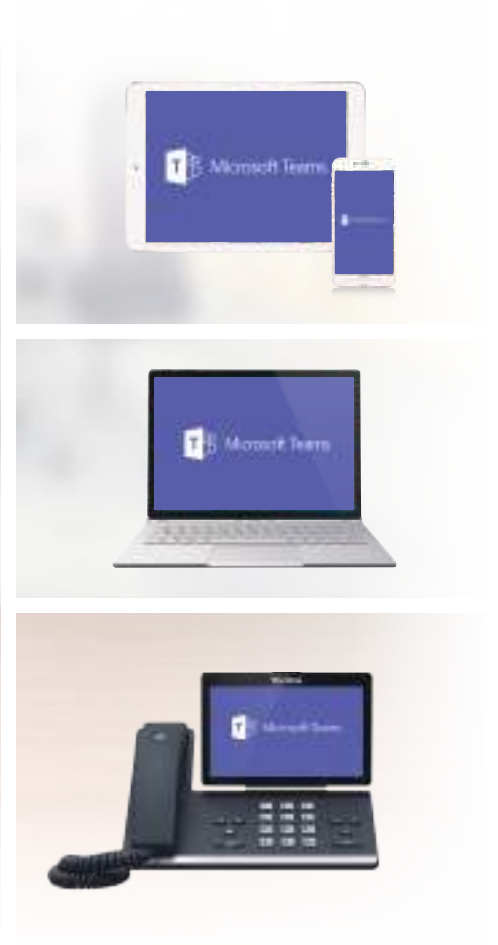

Friendly to busy executives and professionals with familiar keypad design, including useful shortcut hard keys and LED indicators. Visibly saving searching time and improving productivity.

The camera and screen are adjustable; so users can easily and flexibly find the comfortable viewing angle according to the lighting situation and personal needs.

Capability of Easy Customization

· The T5 Smart Business Phone Series is based on Android OS. Service providers are able to customize features and user interface on the phones themselves. As the phone require no PBX-Vendor co-development process, it speeds up GTM process and improves productivity.

· Yealink developed API and SDK tools to simplify the complex and support service providers create deeply integrated solutions.

DECT Compatibility

· By plugging in the Yealink DECT Dongle DD10K, the T5 Smart Business Phone works as a complete DECT system that supports up to 4 Yealink DECT handsets, without the need of Yealink DECT base.

· Add mobile flexibility by supporting Master and Slave mode when only one other DECT handset is registered. The mode allows seamless call shift between the T58V/T58A/T56A and the DECT handset.

Broad Business Applications

Personal collaboration in office or telecommuting:

Easy access to professional HD video and superb voice quality, without the needs of IT support.

Huddle room and small meetings:

Support video conferencing system integration and content sharing for up to 4 people small scale collaboration in an environment such as huddle room and small meeting room.

Front desks or warehouses:

· Rich telephony features to handle busy phone calls and provide professional reception service.

· Integration with third party intercom system allows one-touch door open, visitor preview and video monitoring.
